motorcycles...Historically, organizations claimed 'inconclusive proof' concerning electromagnetic health issues. However, inconclusive proof does not mean that something is safe," says Chipkar. But critics of people such as Chipkar claim that these doom-and-gloom concepts regarding radiation have been heard before and have been conjured up since the 1950s, when atomic energy had firmly become embedded in Americans' psyches, and they never amount to anything other than conspiracy theories. The critics say that it is too easy to scare people about exposure to radiation because those who can gain from the fear mongering fail to make distinctions between different kinds and levels of radiation exposure. www.ON-A-BIKE.com
