Are you a biker who has young children that want to ride with you? Do you ever stay home and leave the bike in the garage on a beautiful day because you can't take the kids along? Are you worried about the safety of your child while he or she is riding with you? If so, the perfect solution for you is a Child's Riding Belt. The Child's Riding Belt is a harness that secures your child to you so that you can have the peace of mind that your child is safe while you are riding. The harness that is fitted to the child is attached to a nylon-covered foam pad that has handles for the child to hold on to and a belt attached to it that goes around the driver's waist. The driver's belt fits waist sizes from 35" to 45", and the child's harness is adjustable and can hold up to 100 pounds. A couple of years ago, I purchased a Child's Riding Belt for my daughter who was four years old at that time. She was somewhat afraid of motorcycles and wasn't sure if she wanted to ride with me because she thought she would fall off. So, my boyfriend did some searching on the internet and found this belt and we ordered one so we could try to get her used to riding with mom at a young age. My daughter is now six years old, and I can't keep her off of the bike! She loves to ride! Also, every now and then she falls asleep while we are riding, and the harness keeps her from falling to the side when her head begins to nod. The Child's Riding Belt makes children feel safe, and parents feel secure knowing that they have full control of the child riding behind them. The price of the Child's Riding Belt is \$165.00 plus shipping and can be placed by phone or online. If you have any questions or would like to place an order for a Child's Riding Belt, call 1-877-211-6793, or visit the website at ultimateplusonline.com. This belt also works well when riding snowmobiles, ATV's and horses. Make riding a family affair and enjoyable for all!
