

Check out this bike made of almost all wood from a brother on the inside. Kyle is in Waupun and sent me this amazing piece that was handcrafted in woodshop. He mentions all of it is wood except a battery wire, plug wire, leather belt and the spring for the throttle.

The bike is 50" long and everything that he could get to work does. The throttle turns and returns, the tensioner moves forward & back to tighten & loosen belt. Push the pedal and the chain turns the pulley on the motor. Spark advance works, oil and gas petcocks

work, gas and oil caps go on and off.

He says he is thinking of doing a "47 Pan or a "\$@" WLA military bike next..

All I know is Kyle has got a great talent. Great job. Look forward to seeing the next one.
