Cover Bike

Back in my wilder days I owned an Arlen Ness, that bike was fast. I could ride around the block and catch the cops chasing me. As I matured, my love of the "fast" lane progressed into a custom kinda fast. The next bike was a custom Fat Boy, dual carbs, custom paint, errr, errr, errr...made the chicks squeal! My final step into the joys of the fast ride is the bike you see here in the photos. This is by far my fastest and smoothest ride.

Hold on, you may have to pick your soul up after this ride home!

This bike was custom built for me by Osbourne Pro Street in Wisconsin Rapids. Unlike the "TV" show builders who order their parts, this guy makes them! My bikes 127 diamond cut motor, along with the 6 extra clutch discs make it faster than saying "Holy" in Holy Shit, and if the bitch doesn't hang on she WILL fall off. The women like the nice ride of the air ride suspension and gel filled passenger pad, it's removable. If ya lose her or she falls off, you can find a more worthy passenger and put it back on. I had an old pin on my leather jacket, gave it to the painter, a 22 year old kid named Wade Neiman, and he transformed it into a killer work of art!! There are much, much more extra's on this fine ride to mention, you'll know it when you see it cruisin' around Rapids.

Keep the wind in your face and have a fast, safe ride!!!
Kurt
